

Troublesome world

I see the skies crumbling down upon our big bad world
What shall we do with the problems of our big large want
Shall we help save our beings or just let them die
let them burn, let them burn, like the fires in the skies
Save them from hell and send them to paradise
Let them burn, let them burn, those beings in disguise
People are dying and we neglect them
We eat and we laugh and forget them
What about all the animals that sat foot in our lowsom troublesome world ?

Look at our earth dying
Look at our minds lying
Look at our hearts cheating
Look at our hands ripping
My mind is invaded by troublesome troublesome words
Troubleish Troubleish fools, troublesome troublesome words

Look and laugh and play and fool around
Look and laugh and neglect them
Kill and burn skin them to the bone
Troublesome troublesome world

Opinions are hidden, and words are forgotten
And minds are all frozen in time
People are cheating for people are dying
Earth is a place that respects as for trying
But humans go against the rules that are given
Some words are forbidden, my thoughts are rewritten
And i have an opinion
Us humans are foolish and blind.
